\*Life insurance is calculated based on the outstanding balance for the total credit facilities (105%) over the full period of the loan and endorsed to the Bank as first beneficiary. It should be issued by an insurance company from the approval list. Insurance amount will not be included in the loan; it will be debited on a monthly basis from client's settlement account.

\*\* Fire insurance on property covering 100% of the real value of the premise subject to the loan (construction value and content), paid in cash on a monthly basis . Insurance covers the premise against any damage resulting from fire, explosion, earthquake, or neighbor's recourse. Any additional reason for damage will bear an additional cost to the premium. \*\*\*The Life insurance monthly premiums decrease in parallel with the decrease of the loan's outstanding balance.
